

Health Impact Assessment of the Proposed Compressor Station, Weymouth, MA

COMMUNITY MEETING

We now have a meeting location: Quincy High School

Thursday,
November 15
7 p.m. - 9:15 p.m.

Quincy High School
100 Coddington St.
Quincy, MA 02169

Join us for our second community meeting as part of a Health Impact Assessment (HIA) the proposed natural gas compressor station in the Town of Weymouth.

The community meeting will include an open house with a brief presentation to provide participants with an update on the HIA and engage in discussions about projected changes, estimated impacts, and potential recommendations.

Please RSVP at the link below if you plan to attend!

How can we help? Let us know.

[For more information, please visit the HIA project website here](#)

WHAT IS A HEALTH IMPACT ASSESSMENT?

A Health Impact Assessment (HIA) is a process that uses available data, health expertise, and public input to identify the possible health effects of a proposed change. HIAs are used to assess proposals, such as development projects or legislative policies, to produce recommendations that optimize health outcomes.
